

ASANM11611621203001

India's production of food grains has been increasing every year,		
		India is among the top producers of several crops such as wheat, rice, pulses, sugarcane and cotton.

ASANM11611621203002

It is the highest producer of milk and second highest producer of fruits and vegetables.		
		However, the agricultural yield (quantity of a crop produced per unit of land) is found to be lower in the case of most crops, as compared to other.

ASANM11611621203003

Agricultural growth has been fairly volatile over the past decade, ranging from 5.8% in 2005-06 to 0.4% in 2009-10		
		Such a variance in agricultural growth has an impact on farm incomes as well as farmers' ability to take credit for investing in their land holdings.

ASANM11611621203004

This report provides an overview of the state of agriculture in India. It discusses factors related to the production and post-harvest activities in agriculture.		
		India's productivity has also grown at a slower rate as compared to others.
